

OUR WORK, PRIORITIES AND PURPOSE

Swiilawiid is a community-centered and culturally guided organization that cares deeply about the sustainability and well-being of Haida Gwaii. We actively work to contribute to healthy communities, lands, air and waters. We are constantly inspired by the people of Haida Gwaii and hope to inspire others in our work. As Haida citizens and people of Haida Gwaii, we are proud stewards of the land and sea, and we're committed to working with our friends and neighbours to increase Island independence, by recognizing the interconnectedness of all things, amid the changing climate.

Swiilawiid was founded with a clear vision: to see Haida Gwaii lead in the transition to equitable, regenerative, community-owned power. Today, we do this through Project 0% Diesel and we support other initiatives and partnerships that contribute to the responsible stewardship of Haida Gwaii.

WHAT DOES SUSTAINABILITY MEAN TO US?

Living in a way that demonstrates we know we are part of the natural world. We're purpose-filled and prioritize iterative projects and meaningful partnerships that bring us closer to sustainability as a way of life. We follow different pathways towards this vision.

1 | Pathway

Identify and address inequalities and barriers to achieving food and energy sovereignty

2 | Pathway

Engage the people of Haida Gwaii around a community-defined vision, goals, and a healthy future

3 | Pathway

Build and strengthen strategic partnerships that take care of Haida Gwaii

4 | Pathway

Develop resources that inspire individual and collective action
